\$300,000 Mathematics Center to Replace North Hall

Math Department, Classes Relocated

The math classes, dislocated by the recent North Hall fire, have been rescheduled for the remainder of the semester, acting President Harold W. Browning announced recently.

The classes have been scattered in buildings throughout the campus in the regular eight to five class day. Dr. Browning said the proposed five to six schedule was not required since there was adequate space available during the regular school day.

Dr. Browning said the problem has been in relocating the mathematics department. However, he added, that has been solved and the math department is presently located on the second floor in Bliss Hall.

The scheduling office is presently working on the math class relocations for next semester.

The smoldering ruins of North Hall.

(URI photo)

Tentative Location Set For Structure

A site northeast of Beta Psi Alpha has been tentatively chosen for the building of a new \$300,000 North Hall, scheduled to be under construction in early April, acting President Harold W. Browning announced Monday.

According to preliminary plans the new building will have 10 classrooms and office space for 20 faculty members. It will probably be a two-story red brick structure similar to Woodward Hall, Dr. Browning said. The building is hoped to be ready for occupancy by the beginning of the fall semester.

Acting President Browning said the tentative site, subject to the approval of the Board of Trustees, was chosen because the various utilities were easily available and did not require the relocation of underground piping. The site is ready for ground borings, a prerequisite to construction, he said.

The schedule set up for the construction of the building calls for the preliminary architectural drawings to be submitted Feb. 1 and final drawings and specifications, on March 1. Ground breaking is scheduled to take place April 1. The new building will have 12,000 sq. ft. as opposed to the 10,000 sq. ft. of the fire-razed North Hall.

Governor John A. Nottle said the money to finance the construction could come from the following sources:

A 1958 URI bond issue, \$50,000; a dormitory equipment account under a state appropriation, \$20,000; insurance on the burned building, \$60,000; lowering the contingency allocation in a \$3,500,000 1960 university bond issue, \$170,000.

The \$170,000 would either be replaced by a new bond issue proposal or, if the proposal failed to pass, the lowered amount would be absorbed in the existing bond issue, the governor said.

The wooden-structured North Hall, scheduled to be replaced in the long-range university master plan, was destroyed by an early morning fire on Dec. 26. A former World War II barracks, the building housed the mathematics and maintenance departments.

Records of the mathematics department were severely damaged by the fire but some were able to be salvaged. According to Dr. Browning, no gradebooks were lost in the fire.

According to reports, the fire started in the north end of the building where the university maintenance department had an office. To date no clues have been uncovered as to the cause of the blaze.

Plan For New Men's Dorms

The university has been given official approval by the Federal Housing Authority for a loan to construct two new men's dormitories, it was announced recently.

According to the university master plan the two 200-man dormitories will be located west of Adams and Browning dormitories toward Keaney Gym. The buildings will be constructed from modified Browning Hall plans to suit overall university plans, to save time, and to profit by the experiences of the architect on the former building, a university spokesman said. Construction schedule calls for plans to be received from the architect on March 1 and bids to go out by March 15. The bids will be opened on April 15. The 15-month construction period is expected to begin in May.

Faculty Member Selected For Study

Prof. Henry Campbell, chairman of the URI department of civil engineering, has been selected by the engineering department of the DuPont Company to participate in the company's "Year-In-Industry" program.

Dean T. Stephen Crawford of the URI College of Engineering said Professor Campbell would be given a year's educational leave of absence during the 1962-63 academic year to spend a year in residence at the DuPont engineering department in Wilmington, Del.

This program is designed to provide participants with an opportunity to study the philosophy, principles and practice of engineering as applied in modern industry," Dean Crawford said.

To gain accurate impressions, all phases of activities are available to the visiting educator. He is considered a member of the engineering organization and has the chance to observe all operations in the offices, laboratories, drafting rooms and plants as they actually occur," he said.

Funds Collected For Prof., Family

More than \$5000 has been collected in a fund for Dr. Robert J. Gerraughty, URI assistant professor of pharmacy, whose six-year old son died in a fire which destroyed the Gerraughtys' Narragansett house Dec. 23.

The fund is being conducted by Edward M. Gormley, a Narragansett pharmacist, and the URI college of pharmacy. Dr. Gerraughty works part-time in a drug store operated by Mr. Gormley.

Dr. Heber W. Youngken, dean of the College of Pharmacy, said Monday the college has received about \$2000 in donations from URI faculty members and Rhode Island wholesale drug companies.

Dean Youngken said Mr. Gormley had collected more than \$3100 from Narragansett residents as of last Monday. The fund will be continued until Feb. 1, he added.

Dr. Gerraughty, his wife, three other children and two house guests were rescued from the fire without serious injury but firemen were unable to reach Dennis, 6, who died of suffocation.

The Gerraughtys are now living on campus in the Tucker House which was made available by Thornton N. McClure, URI business manager.

Dr. Gerraughty was treated for smoke inhalation at a Waltham, Mass. hospital. The family went to Waltham Christmas Day to visit relatives. He was released Friday.

Dean Youngken said he was "proud of the university community for contributing clothing and food for the family." Contributions for the fund can be mailed to the College of Pharmacy.

No More Beacons Till Next Semester

This is the final edition of The Beacon for this semester. Publication of the newspaper will resume February 7.

Dr. Cobble Appointed as Dean Of URI College of Agriculture

Dr. James W. Cobble, the newly appointed dean of the URI College of Agriculture, will assume his position July 1.

The appointment was announced at the December meeting of the Board of Trustees of State Colleges.

Dr. Cobble, presently associate dean of the college, will succeed Dean William H. Wiley who is resigning to become dean of agriculture at Clemson College, South Carolina.

Dr. Cobble has held his present position since 1959 when he also was named associate director of the Rhode Island Agricultural Experiment Station. He joined the URI faculty in 1951 as head of the animal and dairy husbandry department.

The new dean will hold the titles of Director of the Experiment Station and of the Cooperative Extension Service, the agency of the College of Agriculture responsible for community assistance programs.

A native of Missouri, Dr. Cobble graduated from Southeastern State Teacher's College there in 1939. He taught elementary and high school until the following year when he worked as an investigator for the Missouri Social Security Commission. From December, 1941 to November, 1945, he served with the U. S. Coast Guard.

After his discharge, Dr. Cobble attended the University of Missouri from which he received his B.S. in agriculture in 1947, his M.S. in 1948 and his Ph.D. in 1951.

He is a member of several professional and scientific organizations including Sigma Xi, Phi Kappa Phi, the American Dairy Science Association, the American Association of Land Grant Colleges and Universities and the National Association of Milk and Food Sanitarians.

Dr. Cobble has held his present position since 1959 when he also was named associate director of the Rhode Island Agricultural Experiment Station. He joined the URI faculty in 1951 as head of the animal and dairy husbandry department.

The Horns will return Feb. 8. Dr. Harold Browning, URI vice president, will be acting president while Dr. Horn is away.

Dr. James W. Cobble

Have a Good Time

The white house on Upper College Road is vacant.

Dr. and Mrs. Francis H. Horn departed for Lisbon last Friday to begin a month's vacation. Their trip will include visits to Madrid, Cairo, Jerusalem, Beirut, Vienna, Frankfurt, Paris and London.

Dr. Horn has been asked by the American Ambassador to give a public lecture while in Cairo. The President and his wife plan to visit Beverly Giordano, a URI junior who is studying abroad for a year, while they are in Spain.

The Horns will return Feb. 8. Dr. Harold Browning, URI vice president, will be acting president while Dr. Horn is away.

Dean Quinn Will Speak at Frosh Convo

Dr. John F. Quinn, dean of men, will speak on "Preparation for and Taking Final Examinations" at the compulsory freshman convocation tomorrow at 1 p.m. in Edwards Hall.

Dean Quinn said he chose this topic because the impending final exam period will be the first one for the freshmen. He said he will try not only to lay down a list of rules for those taking exams but also to include some evidence, illustration and personal interest items that may be helpful to the students.

Why An Editorial Page?

Historically speaking, one of the most interesting developments in this country has been the simultaneous growth of American newspapers and American democracy. This dual rise has been vital to our way of life because it has established a "checks and balance" system between the people who are ruling and those being ruled.

Until the 1880's, the press expressed partisan feelings and opinions on controversial matters directly in the news columns. Later, the partisan press gave way to a more objective form of coverage, with the news columns being devoted to just that — news.

This signalled the rise of the editorial page. The newspapers, in their roles as communication organs, had to speak. The editorial page was developed as the vehicle for expressing the opinions and interpretations of the newspaper.

The editorial page was distinguished from the rest of the newspaper by having typographical innovations used on it. Also, the printed material on the editorial page was usually of an interpretive or opinion-giving nature. Straight news, as such, was used little, if at all, on this page.

Since that time, the editorial page has been devoted by the editors to explain and clarify important issues, to express views and to bring to the attention of the readers those important incidents and happenings that they might have otherwise overlooked.

Through the editorial page, the editors have become the watchdogs, reformers and even the interpreters of the American scene. These principles are important, so much so that they are the prerequisites of every responsible newspaper.

Read the editorial page.

Visiting Scholar Speaks On Science

Dr. John Kemeny, chairman of the department of mathematics at Dartmouth College and professor of philosophy, said that there exist laws "which man will never be able to discover no matter how long he exists."

Mr. Kemeny, the fifth visiting scholar of the URI series, spoke on "Fundamental Assumptions of Science" before an audience of 250 in Independence Hall Auditorium Monday night.

Mr. Kemeny said that a scientist is useful to society because he "looks at the past and then can look at the future."

The Dartmouth philosopher argued that the laws of nature are problems of human limitation. He said it is not true that if law exists a person can understand it. "No matter how long man exists, there are some laws that will never be discovered as there is not a language even to describe them," he said.

Professor Kemeny was born in Budapest, Hungary and came to the United States before World War II. In 1948-49 he was the chief assistant to Albert Einstein at the Institute for Advanced Study at Princeton.

During World War II, while still in his teens, Professor Kemeny served with the United States Army as a mathematician attached to the Los Alamos, New Mexico, atomic bomb project.

Professor Kemeny has written seven books, three of which are experimental texts for the Mathematical Association of America.

Graduate Student Association Provides Opinion-Voicing

by Peter Cassels

The URI Graduate Student Association, now in its third year, is the only university organization providing graduate students with the opportunity to voice opinions on matters affecting URI and in particular its graduate students. More than 500 students earning graduate degrees in 17 subjects ranging from agriculture to zoology are eligible for membership.

In an interview, Thomas Gaucher, a graduate student in oceanography and president of GSA, said the purpose of the organization is "to further the intellectual, cultural, social and academic interests of all graduate students, and to stimulate a greater degree of communication among the diversified disciplines."

"One of the biggest problems of the GSA is stimulating social mixing among students in different departments," he said. Often, the student will be absorbed in his own department of study and will have little contact with his fellow graduate students in other fields.

Social mixing is not the only function of the GSA. Under its program of visiting lecturers, the organization has invited several guest speakers to attend meetings throughout the academic year. At its Nov. 30 meeting, GSA heard Dr. Gordon S. Christianson, chairman of the de-

partment of chemistry at Connecticut College for Women, talk on "The Logic of Unilateral Disarmament."

Anticipated future speakers will include Senator Claiborne Pell of Rhode Island and a representative from the American Sunbathing Association. Both speakers will appear this spring.

Since its inception, GSA has been evaluating the desirability of establishing an affiliation with graduate students at the University of Guayaquil, Ecuador, under the College and University Affiliation program of the United States Information Agency.

"The purpose of such a program lies in the prospect of improving Pan American understanding and in the broadening of our respective attitudes in international matters," Mr. Gaucher said. "The association's range of activities would include the exchange of flora, fauna, minerals, books, newspapers, films, tape recordings, records, and other cultural items or displays, and to carry on periodic short wave transmissions between the two schools. Such a project would attempt to encourage international understanding through educational institutions. We would like the advice and help of any faculty members, undergraduate and graduate students who are interested in promoting the affiliation program."

At previous meetings this semester the chief topic of discussion was the Graduate Activities Tax, instituted by the administration last year. In previous years, the graduate students were not affected by the tax paid by all undergraduates in their term bills.

Although the GSA members do not object to paying an activities tax, they did object to the fact that most of the revenue would be distributed to undergraduate organizations, with the graduate association receiving nothing.

After submitting a petition to the administration through Dr. Ernest W. Hartung, dean of the college of graduate studies, the graduates and the administration worked out a suitable distribution of the graduate tax revenues.

"The revised activities tax is an example of how our organization works with the administration on problems affecting the graduate students," said Mr. Gaucher.

Besides Mr. Gaucher, officers are Judy Pendleton, vice president; Patricia Iselin, secretary and Gary Girard, treasurer. An executive council consists of John Rosecrans, Gil DiLeone, Paul Hardner and Betty Becker.

Letters to the Editor

Seniors Impress

I think your readers will be interested in the following excerpt from a letter I have just received from the manager of the Department of Scientific Staff Relations of a major electric company in a neighboring state:

"On Friday, December 15, I had the pleasure of my first visit to your university and I would like to take this opportunity to compliment you on the impression I received both of your seniors whom I interviewed and the organization and operation of the Placement Office."

"The first time in a rather long experience, every man I saw during the morning was of a caliber to be invited to our plant for visits and to be seriously considered for employment. As I interview in the best colleges and universities in the Northeastern United States, I was both surprised and delighted to find such a fine group of men in one place."

I am sure all URI students will be proud, as I am, of this accolade for our seniors.

Francis H. Horn
President

West Coast Views

In view of the current objections of some to the intercom system in Browning Hall, the following statements from similar state institutions may be of interest:

1. "As there are 400 women students in the 200 rooms in the Hall, it is essential that we have a reliable, effective intercom system. This the DuKane has proven to be." San Francisco State College.

2. "No problems in two years of intercom other than minor mechanical difficulties. Beep protects student privacy." Chico State College (California).

3. "I spent several years as a staff member with the state colleges and was not aware of any special problems relating to this (DuKane) system." University of California (Berkeley).

I believe the sensitivity of West Coast college groups in the area of student rights is well known.

John F. Quinn
Dean of Men

Views Questioned

In "Hamlet Had A Choice" (The Beacon, Dec. 6) it's written, in reference to the "inequitable enforcement" of the censorship "law": "There is absolutely no reason for this procedure." This appears to be merely an expression of opinion, whereby a final, sweeping claim is made in order to be convincing. The reasons for the procedure may not be good, but they are still reasons.

Also in the Dec. 6 issue of The Beacon we were told "the real significance" of the publication of the Kennedy-Adzhubel interview: "Never since the inauguration of Communism has an opposing view been allowed to be uttered, let alone printed, in the Soviet Union." This follows a statement that "it had been printed almost completely in the Soviet Union."

How does The Beacon know that no distortion was involved (as some suspect) in the Soviet publication? But, if correctly published, how was it known that this was the first time in the history of Soviet Communism that the utterance (or printing) of opposing views has been allowed? I believe that the newsmen of the free world would have rejoiced if this were the first time. Don't you?

As for the article's little addition as to Communism's way of doing things, may I add that it was tragically in error.

I realize that The Beacon is not a scholarly journal and is "supposed to" print things of interest. But the freedom from historical documentation and philosophical exposi-

tion does not leave The Beacon writers free to manufacture interesting stories or to pawn off their views as being accurate and final. I'm asking for responsible and enlightening comments of matters of interest, not opinions with the air and label of humaneness, truth and virtue.

Alan Manekofsky

Editor's Note: By definition, an editorial is a statement of the newspaper's opinion. For further information on this subject, we suggest the author of the above letter read this week's editorial.

Pay Late - Why?

It seems to me that the student payroll situation is becoming increasingly cumbersome. The student checks have been late several times; this month they are a week late.

This delay is unexplainable because the payroll is sent to the payroll office by each department at least a week ahead of the payroll date.

Many students depend on their checks being on time. The students have bills to pay—bills that cannot be put off as the pay checks are.

The payroll office could find a way to pay the students on time. Excuses like a check machine breaking down or an accident involving the messenger who brings the checks from Providence are good for a one day delay only, if that. A whole week's delay is hard to conceive of.

The haphazard attitude of the payroll office should be corrected, preferably by officials at a higher level. The students would like to have their meager salaries on time.

John Cookinham

On Friday, student workers at this university were told that their paychecks would be distributed on Monday. This happens occasionally, although it should not, and there was only the usual amount of grumbling.

But on Monday, there were no checks—only a sign on the door of the Personnel Office saying that checks would be distributed "before Friday." There was no explanation of the delay—just the sign. Those who were so bold as to inquire as to the reason for the delay received no explanation.

This is a disgrace. If some unavoidable difficulty occasioned the delay of student paychecks, I believe that those students who are thus inconvenienced are at least entitled to the small courtesy of an explanation of the trouble. I hope that such an attitude toward student workers on the part of the administration will not continue in the future.

Doris E. Wise

Walk Needed

During the latest turmoil of excavating, building and remodeling to make URI beautiful, is it possible that concrete walks to Brewster and Butterfield could be installed?

As it is now, each rain storm erodes the dirt around what is left of the walk down to Butterfield. Eventually, some of the dirt on the walk, as well as the dirt from where the walk has broken, gets carried into the dormitories.

With concrete walks, especially an inch or so above sidewalk level, there would be much less dirt for the janitors and students to sweep.

George Bayes

Attention, Please!

People of the world had better spend less time fighting one another and pay more attention to saving the forces of nature, such as insects, water shortages and diminishing resources, things that have the final say about how we live.

Three Societies Hold Elections; Dining Official Cites Sorority Negligence

25 Candidates Are Honored

Three URI honor societies recently held elections for membership. Graduate students elected to Phi Alpha Theta, history honor society, were Joseph Parker, Peter C. Stewer, Owen Eagan and Richard A. Greene. Undergraduate students elected were Mrs. Nancy Miller Cyr, elected Mrs. N. Nivica, Julius E. Fuchs, Guy J. Alba, Elaine M. Robinson and Donna A. Cohn. Students elected to Pi Sigma Alpha, honorary political science society, were Mary Lou Dauray, Robert

B. Brown, Donley R. Taft, Joseph F. Parise Jr., Alex Hrisanthopoulos, Albert C. Henry Jr. and Vincent S. Ceglie. Faculty members elected were Prof. George O. Totten and Prof. Frederick W. Wurzburg. Edward P. Conaty, chief of the State division of local and metropolitan government, was elected an honorary member. Students elected to Tau Beta Phi, honorary engineering society were Gerald E. Duguay, John J. Kenny, John A. Messore, Robert S. Rumazza and David E. Tetrault.

Sorority Negligence

The neglect on the part of several sororities to return chinaware borrowed from the dining halls was brought to the attention of the Dining Hall Advisory Board at its latest meeting by Merle Brown, director of dining services. He said there was no objection to lending china for the purpose of entertaining at the houses, if the sororities cooperate on its return. The Board suggested that definite rules be established and distributed to the houses regarding the borrowing of dishes. Coed dining will resume next semester if the plans now being formulated are agreeable to both students and dining service officials. A decision on this question will be reached next month.

National Queen To Be Chosen

The 8th Annual National College Queen Contest, honoring the nation's most outstanding college girl, began its search on campuses recently. Candidates in the contest, which is open to all undergraduates, will be judged on their attractiveness, charm, personality, and achievement in academics, campus and community activities, and hobbies. Regional winners of the contest will receive an expense paid trip to New York City, where the 1962 National College Queen Pageant will be held next June. The winner will receive a trip to Europe, an automobile and a diamond ring among her prizes. An official entry blank and complete contest details are available from the National College Queen Contest Committee, Suite 1606, Paramount Building, 1501 Broadway, New York 36, New York. Nominations may be made by individuals, fraternities, sororities and campus club groups.

NURSE CAPPING SET

The capping ceremony for the URI nursing class of 1964 will take place on Sunday, Feb. 4 at 4 p.m. in Edwards Auditorium. During the candlelight ceremony, members of the class will take the Florence Nightingale Pledge. A member of the URI faculty will be guest speaker. The event is open to the public.

New Library Hours Begin Feb 1

New library hours effective Feb. 1 were announced Monday by Franklin Talbot, URI associate librarian. According to Mr. Talbot, the move was initiated by URI academic deans. He said it is the "responsibility of the student body to utilize this service which is to be offered to them" since the library is doing it "as a favor to the students." Mr. Talbot said the library, before the revision, was open 82½ hours a week as compared with the

national average of 80 hours a week. The new library hours are as follows:
Mon.-Thurs. 8 a.m.—11 p.m.
Friday 8 a.m.—10 p.m.
Saturday 8 a.m.—5 p.m.
Sunday 1:30 p.m.—11 p.m.

SOME IMPORTANT NEW JOBS WERE CREATED BY DU PONT TODAY

The development of new products always leads to challenging new opportunities at Du Pont. Products like time-honored neoprene synthetic rubber, for example. Or more recently, "Delrin" acetal resin for a wide range of plastic applications, and "Cronaflex" engineering reproduction films.

Products like these have created thousands and thousands of jobs at Du Pont over the years. Good jobs that not only contribute to the growth of the company, but assure Du Pont's employees of steady employment and the chance to progress. To keep these jobs coming in the future, Du Pont's annual investment in research exceeds \$90 million.

Right now, there are opportunities at Du Pont for qualified engineers—chemical, mechanical, electrical, metallurgical and industrial—chemists and physicists, sales and marketing men. If you expect to receive your bachelor's, master's, or Ph.D. degree this year, talk with your placement director about Du Pont. For more information about opportunities at Du Pont, clip and mail the coupon below. And be sure to tell us your major so we can send you the literature that's most appropriate.

Environmental Chemistry To Be Topic In Marine Symposium Set For Jan. 13

A symposium on the environmental chemistry of marine sediments sponsored by the URI department of agricultural chemistry, the natural sciences department of the College of Liberal Arts, the

graduate school of oceanography and the Visiting Scholars Committee, will be held this Saturday at 9:30 a.m. in Independence Auditorium.

Contributors to the opening session of the symposium include Dr. Richard Bader of the National Science Foundation, Dr. Bruce Nelson of Virginia Polytechnic Institute, Dr. K. E. Chave of Lehigh University, and Dr. Ed Kuenzler and John Kanwisher of Woods Hole Oceanographic Institution. Participating faculty members include Dr. Milton Salomon, Dr. H. Perry Jeffries and Dr. Towne Conover. Demonstrations will be given by faculty members Dr. Clarence Miller, Dr. Robert McMaster, Dr. Nelson Marshall and Professor Stanley Rubinsky.

Speakers at the second seminar will be Professors Theodore Smayda, Clarence Miller, Robert McMaster and a graduate student, Thomas Gaucher of URI.

The symposium is the first in a series of biweekly seminars to be conducted by the graduate school of oceanography next semester.

Student Receives Golf Scholarship

Lawrence Sheridan, a URI senior in the College of Agriculture, has been awarded a \$400 scholarship by the Golf Course Superintendents Association of America.

The scholarship was awarded "to promote greater student interest, encourage higher scholastic achievement and advance more useful information in the science of golf course management."

Mr. Sheridan has received two other scholarships in the past: the \$100 John Samuel Clapper award and a \$300 scholarship from the GCSAA.

Gibbs Scholarship Forms Available

Two national scholarships for senior college girls are offered for 1962-63 by the Katharine Gibbs School. The awards were established in 1935 as a memorial to Mrs. Katharine M. Gibbs, founder and first president of the school.

Each scholarship consists of full tuition (\$935) for the secretarial training course, plus an additional cash award of \$500, totalling \$1,435. The winners may select any one of the four Gibbs schools for their training—Boston, New York, Montclair, or Providence.

Winners are chosen by the scholarship committee on the basis of college academic record, personal and character qualifications, financial need and potentialities for success in business.

Each college or university may recommend two candidates and each candidate must have this official endorsement. Students who may be interested in competing for one of these Katharine Gibbs awards may obtain full information from the URI placement office in Davis Hall.

Far East Theme Chosen for Ball

The annual International Ball, an all-university dance sponsored by the URI All-Nations Club, will be held in Keaney Gym on Saturday, Feb. 10, from 8:30 until 12.

"Far East" will be the theme of the dance. Tony Abbott's orchestra will provide the music. The gym will be decorated with the flags of all nations and added decorations from Japan, Korea, China, The Philippines, Thailand, Viet Nam and India. During intermission music recorded in different oriental countries will be played and a queen will be crowned in Oriental style.

Tickets are available at the Union desk or from foreign students at \$3 a couple. Dress for the ball is semi-formal; foreign students are invited to wear their native costumes.

Student Scholarship Aid Totals \$9,000

Scholarship aid amounting to \$90,000 has been awarded to URI. Mr. DeBucci reported the total amount of scholarship aid for all students during the current academic year will not exceed \$120,000 unless unforeseen gifts from private sources are received

Recent Additions Made to Faculty

Dr. Saul B. Salla, URI assistant professor of marine biology, has been promoted to the position of associate professor of oceanography, effective Feb. 1, it was announced recently.

Six additions to the faculty were made. Alex Hrisanthopoulos, a URI graduate, was named graduate research assistant in the bureau of government research.

George N. Paradissis was named graduate assistant in pharmaceutical chemistry.

Part-time faculty positions in the department of dental hygiene for the spring semester will be held by Dr. Christopher J. Hanley Jr. and Dr. Louis J. Massacchelli, visiting clinical instructors and Dr. Arthur J. Kershaw Jr. and Dr. Joseph A. Vacovone, visiting lecturers.

CLASSIFIEDS

FOR SALE—1959 Volvo, green, 4-speed transmission, dual carburetors, excellent mechanical condition, one-owner car. John O'Leary, Keaney Gym.

FOR SALE—1960 Chevrolet Impala convertible, standard shift, V-8, ST 3-8726.

LOST—Sterling silver leaf-shaped pin. Please return to Bev Lane, 303 Peck Hall.

LOST—Lady Elgin gold watch with black cord band, in vicinity of Lippitt Hall. Please return to Judi Bennett, Alpha Chi Omega.

Study Rooms Open

The general classrooms in Independence Hall will be open evenings to students wishing to use them for study purposes from 6 p.m. to 11 p.m. from Friday, Jan. 12 through Tuesday, Jan. 23, it was announced recently.

The action was taken upon recommendation of the academic deans and upon the request of students.

Members of Laurels, the senior women's honorary society, will supervise the use of the rooms during that time.

AUTOMATIC LANGUAGE TRANSLATION

ОДНОГО ПОЛЯ ЯГОДА

If computers process data in mathematical terms, how can they be instructed to handle information and applications that are not essentially arithmetic? IBM, in cooperation with the U.S. Air Force, is finding some answers through research in automatic language translation systems.

Machine translation of idioms, for example, is teaching us a great deal about information processing. An idiomatic phrase may have a meaning quite different from the sum of its individual words, and a system that merely matches these words won't come close to translating it. One solution is an "expanded electronic dictionary" that contains idioms and grammatical instructions as well as single words. Work is now under way to clarify meaning further by automatic syntactical analysis.

Systems research such as this requires its own kind

of translation—the translation of an idea into a working system. For people with this ability, who like to travel beyond the boundaries of their specialized areas, IBM offers unusual opportunity. If you're interested in any of the fields in which IBM is making important advances—semiconductors, microwaves, magnetics, superconductivity—and your major is in engineering or one of the sciences, you are invited to talk with the IBM representative. He will be interviewing on your campus this year. Your placement office can make an appointment. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin. Write, outlining your background and interests, to: Mgr. of Technical Employment, Dept. 898, IBM Corporation, 590 Madison Avenue, New York 22, N. Y.

You naturally have a better chance to grow with a dynamic growth company

IBM

IBM will interview Feb. 23.

Sets M and A Scholarships; Cash Prizes to be Awarded

The second annual "House of Edgeworth Scholarship Awards Contest" offering cash awards totaling \$1,000 for college students in marketing and advertising has been announced by Larus & Brother Company.

The scholarship awards consist of three cash prizes of \$500, \$300 and \$200 each for first, second and third places, respectively, given to the students who submit the best

marketing and advertising plans for selling House of Edgeworth pipe tobaccos to the young men's market.

Information concerning budget, market area, product descriptions, duration of promotion and other facts are set forth in the rules of the contest as a guide to the contestant.

Winners of the current contest will be given nation-wide publicity in various trade journals in addition to the cash awards.

Entries will be judged by a panel of three college professors on the basis of originality and practical merchandising value. Further contest information can be obtained from Larus & Brother Company, Inc., Richmond, Virginia.

Ernie Calverley, who piloted URI's basketball team to the Yankee Conference title and a share of the state championship with an 18-8 record last year, has been selected as the 1961 "Coach of the Year" by Words Unlimited. He will receive his award at the organization's 16th annual banquet at Johnson's Hummocks, in Providence on Jan. 24. He was named "athlete of the year" in 1946 by the same organization.

Finance Group Visits Wall St.

The Finance 22 class, Investments, went on a field trip to New York last month to visit the New York Stock Exchange, the American Stock Exchange and the office of Merrill, Lynch, Pierce, Fenner and Smith.

Students making the trip were Orlando Andreoni, Julien Ayotte, Alan Birkenfeld, Paul Cravinho, Charles Crowninshield, Allan Deutscher, Donn Drummond, Howard Frank, William Jensen, Donald Johnson, Daniel King, Lawrence Kortick, David Lees, Kurt Malmgren, Charles Schwartzberg, Rodney Simone, Barbara Starzak, Elliott Turk, David Weiner and Douglas Wells.

Dr. Marvin Pitterman, URI professor of finance and Mrs. Walter Starzak, mother of one of the students making the trip, accompanied the group.

WAA Announces Display Winners

Beta Psi Alpha and Delta Delta Delta were awarded first place in the Christmas Door Display judging held before vacation. The displays, erected by URI housing units, were judged by the Women's Athletic Association on originality, theme, technical effectiveness, basic art principles and general appearance.

Other winners included: Tau Kappa Epsilon, second place; Phi Sigma Kappa, third place; and Theta Chi, honorable mention in the men's division, and Hutchinson Hall, second place; and Eleanor Roosevelt Hall, third place in the women's division.

New Amplifier Installed In Edwards Hall

A new amplifier for the movie projection system in Edwards Hall was installed recently replacing an obsolete unit. The \$389 for the amplifier was taken from the movie fund.

According to Boris C. Bell, director of student activities, the movie budget will continue to operate in the black and the earnings from movie admissions will go into the building fund.

URI Seniors Are Offered Higher Wages

URI seniors will be offered higher starting salaries upon graduation, according to a report recently made available by the College Placement Council.

Raymond H. Stockard, URI director of placement and last year's president of the eastern regional group of the council, reported that the national monthly average for technical offers in all curricula is \$562 as against \$543 a year ago, or a 3.5 per cent increase. Non-technical graduates are receiving offers that average \$463 compared with \$444 last year, or a 4.3 per cent gain.

The survey was made by placement officers in 82 colleges throughout the country. Five other New England colleges participating in the survey are Brown University, Middlebury College, Yale University, Tufts University and the University of Maine.

Plans Being Made For Trip to Europe

The Kingston Educational Association, a student organization which is sponsoring a flight to Europe this summer in conjunction with the British Overseas Airlines Corporation and the Westerly Travel Bureau, will hold a coffee hour in the Memorial Union this afternoon to discuss plans for the trip with any interested persons. Check the Union bulletin board for the exact time and place of the meeting.

Representatives of B.O.A.C. and the Westerly Travel Bureau will answer questions about the chartered flight which will cost approximately \$285 per person. Students, faculty, staff, alumni and their families are invited to sign up for the flight.

Fund Established

A contribution establishing an endowment fund was received last month by URI.

Dr. Nicholas R. Locascio, a New York City psychiatrist, has given \$500 to start an endowment fund, income from which will be used for an annual prize awarded a student in Italian. The gift was initiated at the request of Professor Henry Capasso of the URI modern languages department who was an associate in Italian at the Middlebury summer school where Dr. Locascio is working for his master's degree in that language.

Wrestling Team Loses, As New Sport Invades URI

by Harvey Goodman

Wrestling has finally come to the University of Rhode Island. Today, wrestling is the fastest growing amateur sport and its inclusion in the college sports program is now growing at a rapid pace. Similarly, its growth in high schools is moving just as fast.

Coach Lee Haslinger of the URI wrestling team speaks very highly of the sport that fits in well with President Kennedy's Physical Fitness Program. "Wrestling is a very vigorous and demanding sport that combines physical conditioning, skill and mental discipline far above any other sport. This is, to me, one of the real strengths of the physical fitness program."

The athletes participating in wrestling are put under very strenuous training rules. The boys must watch their diets very closely and feel the physical exertion if they do not get enough rest.

The URI team is composed of one senior, two juniors and the rest sophomores. There is a strong contingent of freshmen on the squad but they are ineligible to participate this year. Coach Haslinger says that "this is a young squad with the potential to compete with other teams in our league with the same principles."

Of the seventeen upperclassmen represented on the squad, 11 have wrestled in high school.

So far this year, the new team has had one wrestling match against Worcester Polytech Institute which defeated URI 26-5. The only point score for the URI team was a draw by John McIntosh in the 147 lb. weight class and a 6-4 win by Ray Corona in the 177 lb. class. Coach Haslinger feels that "the prospects are dim, limited by youth and the lack of depth. During the regular season, we have so many holidays and exams that these tend to interrupt the training procedures."

Asked if there are rules to help prevent injuries in this sport, Coach Haslinger answered that "the wrest-

ling rules have been modified to encourage a pinning combination and to eliminate the defensive style of wrestling. This makes the sport more interesting to both the participant and the spectator."

It will take time before Coach Haslinger and the URI wrestling team will reach a height of qualified caliber but with the proper interest in the sport and good participation by the athletes, URI could in the foreseeable future field a winning wrestling team.

This Friday at 8 p.m., Connecticut which recently lost to Wesleyan University 26-10, will meet the URI wrestling team in the first match ever to be held in Keaney Gymnasium.

The Lineup

Weight Class

- 123—Ralph Gonnella (former R. I. state champion)
- 130—Mel Marks (Plainview, N.Y.)
- 137—Charles Nelson (Cranston, R.I.)
- 147—John McIntosh (Cranston, R.I.)
- 157—Marty Katz (Valley Stream, N.Y.)
- 167—Adolph DiBiasio (Providence, R.I.)
- 177—Ray Corona (Providence, R.I.)
- Heavyweights—Lary West or Peter Faber.

Rams Defeat Cats Fri., 82 - 67

The URI varsity basketball team, after dropping its last two games to Oglethorpe and Miami, paced by the strong shooting performance of Charlie Lee, defeated the Vermont Catamounts last Friday night at Keaney Gym, 82-67, to bring its season's record to 5-5.

Lee, who has been averaging close to 22 points per game, scored 32, mainly on jump shots from twenty feet out or better. Others who figured prominently in the scoring were Bobby Logan, starting his second game, with 14 points, and Captain Gary Koenig and Dave Ricereto with ten points each.

For Vermont, Benny Beaton had 22 points and Richie Ader, 20.

Both teams were rather sluggish in the beginning, as URI was leading 9-7 at the seven minute mark. But then Lee began to hit consistently and the Rams slowly moved to a 38-32 lead at halftime. Benny Beaton, who was being covered by Lee, and who had been averaging close to 20 points per game over the Cats' first few games, didn't score his first field goal until the eight-minute mark.

The game was still close until midway in the second half, when the score was 64-57 in favor of Rhody. Then, Vermont began to press and Rhody moved to an in-

surmountable lead. During this time, Lee scored eight straight points, while stealing the ball several times. At the 15:00 mark, the Rams began to freeze the ball, with Ronnie Rothstein doing a fine job in ball-handling.

The game was appreciated by more than 3,000 spectators, and brought the Rams' overall record to .500 and their Yankee Conference standing to 2-0.

PIONEERING

Somewhere out there, beyond the realm of man's present understanding, lies an idea. A concept. A truth.

Gradually, as it comes under the concentration of disciplined minds, it will become clear, refined, mastered. This is the lonely art of pioneering.

In the Bell System, pioneering often results in major breakthroughs. Planning the use of satellites as vehicles for world-wide communications is one. Another is the Optical Gas Maser, an invention which may allow a controlled beam of light to carry vast numbers of telephone calls, TV shows, and data messages.

Breakthroughs like these will one day bring exciting new telephone and communications service to you. The responsibility of providing these services will be in the hands of the people who work for your local telephone company. Among them are the engineering, administrative and operations personnel who make your telephone service the finest in the world.

RAMbling along . . .

by Alan Birkenfeld

For over a quarter of a century, Frank W. Keaney, firehorse basketball and URI were synonymous. Memories are fond in the gymnasium which bears his name, but how many "atop the hill" remember him?

In 1920, Frank W. Keaney, a graduate of Bates, was called to Rhode Island State College as director of athletics, coach of all sports and instructor in chemistry. Eventually, tiring of competing with teams of superior height and power, Keaney began experimenting with a one-handed, long-passing, fast-breaking, plentiful-shooting style of attack putting pressure on the opponents on all parts of the court. At first, this was called fire-engine and race-horse basketball, and other less charitable names. In 1931, Rhode Island State became the first "point-a-minute" team. Continuing this pace, State's "free-wheeling" teams increased their output until they were called the "2-point-a-minute" teams by William G. Mokray, their publicity director who is currently the head of the basketball department at the Boston Garden. Soon, other schools were copying this style, which resulted in the wild scoring era in which we now live.

During the 1945-46 season, Rhode Island State, still under Coach Frank Keaney, headed the New England Conference and had the highest scoring average in the country, 75.6; 1875 points in 24 games, of which 21 were won. In a quarter-final match of the National Invitation Tournament that year, Ernie Calverley, 5 ft. 10, 145-pounder, and currently the coach at URI, sent the game with Bowling Green into overtime with a 55 foot shot in the last two seconds of play. The Rams defeated the Ohioans, and Muhlenberg, before meeting Kentucky in the final, losing in the last few seconds of the game, 46-45 on a foul shot by Ralph Beard,

after the score had been tied 12 times. Calverley scored 51 points in the Tournament and received the Most Valuable Player award.

To backtrack, for a moment, two weeks prior to the opening of the NIT, the players who reported to practice one day were shocked to find smudge pots stationed around the court which made the gym smokey. A reporter asked Mr. Keaney, a great psychologist, as well as one who possessed a keen sense of humor, what was the idea of the smudge pots and smoke, to which he replied, "We like to practice under game conditions, as that's how the game will appear next week at Madison Square Garden where smoking is permitted." Naturally, Keaney didn't mention that the Garden has a good exhaust system which did not in any way interfere with the play on the floor. He was merely interested in boosting the confidence of his players.

As a final and lasting reward for his great contributions to the game, Frank W. Keaney was elected to the Naismith Memorial Basketball Hall of Fame on May 1, 1960.

In the entrance to Keaney Gymnasium at URI hang many plaques which bear tributes to his long and illustrious career, a career which we at URI have much to be thankful for.

YC Standings

The Yankee Conference standings as of Monday include:

	W	L
RHODE ISLAND	3	0
Maine	2	1

Massachusetts	1	1
Vermont	2	3
New Hampshire	0	3

URI Rams To Play Friars In Providence Tomorrow Night

After fighting off three Yankee Conference opponents in succession, the URI Rams take on the Providence College Friars in Providence tomorrow night. Providence was considered fourth in the country in pre-season picks by the AP and UPI, and was even third for one week, but after four losses in succession to DePaul, Xavier, Wisconsin and New York University, the latter two in the Holiday Festival Tourney held in Madison Square Garden during the Christmas recess, the Friars are looking forward to a revenge.

Last season, the Rams defeated the Friars at Providence 78-76, with Stu Schachter scoring 22 points. In the other tussle, the Rams lost in overtime, 68-66.

Providence College, sporting a 7-4 record, has height to spare, with a starting lineup of 6-10 Captain Jim Hadnot, 6-10½ John Thompson, 6-5 Carl Spencer, 6-0 Ray Flynn, and 5-8 Vinnie Ernst,

the Most Valuable Player in the National Invitation Tournament held last year at Madison Square Garden. Other players who will see plenty of action include 6-6 George Zalucki, 6-2 Tom Folliard, 6-4 Dick Leonard and 6-0 Bob Simont. Jimmy Stone, a starting guard, is lost to the Friars for several weeks with a knee injury.

The Friars play a 1-2-2 defense.

with Ernst the chaser. On offense, they have been playing a double post, keeping the two big men under the basket. Offensively, the Friars two main faults may be a lack of consistent scoring from the outside and the failure to take advantage of their height on the backboards.

A freshman game preceding the varsity one will begin at 6:30 p.m.

On Campus with Max Shulman

(Author of "Rally Round The Flag, Boys", "The Many Loves of Dobie Gillis", etc.)

RING IN THE NEW

Are you still writing "1961" on your papers and letters? I'll bet you are, you scamps! But I am not one to be harsh with those who forget we are in a new year, for I myself have long been guilty of the same lapse. In fact, in my senior year at college, I wrote 1873 on my papers until nearly November of 1874! (It turned out, incidentally, not to be such a serious error because, as we all know, 1874 was later repealed by President Chester A. Arthur in a fit of pique over the Black Tom Explosion. And, as we all know, Mr. Arthur later came to regret his hasty action. Who does not recall that famous meeting between Mr. Arthur and Louis Napoleon when Mr. Arthur said, "Lou, I wish I hadn't of repealed 1874." Whereupon the French emperor made his immortal rejoinder, "Tapi que nous et tyler tu." Well sir, they had many a good laugh about that, as you can imagine.)

But I digress. How can we remember to write 1962 on our papers and letters? Well sir, the best way is to find something memorable about 1962, something unique to fix it firmly in your mind. Happily, this is very simple because, as we all know, 1962 is the first year in history that is divisible by 2, by 4, and by 7. Take a pencil and try it: 1962 divided by 2 is 981; 1962 divided by 4 is 490-1/2; 1962 divided by 7 is 280-2/7. This mathematical curiosity will not occur again until the year 2079, but we will all be so busy then celebrating the Chester A. Arthur

Bob Lund, a junior and a mainstay from last season's cross-country team, has been elected its captain for the 1962 season.

NORMAN BECK, RAY MANCHESTER, AL NAJJAR, BRUCE OLSEN
 AND PHIL SAULNIER FROM URI WILL BE AT YOUR SERVICE.

bi-centenary that we will scarcely have time to be writing papers and letters and like that.

Another clever little trick to fix the year 1962 in your mind is to remember that 1962 spelled backwards is 2691. "Year" spelled backwards is "raey." "Marlboro" spelled backwards is "orobhram." Marlboro smoked backwards is no fun at all. Kindly do not light the filter. What you do is put the filter end in your lips, then light the tobacco end, then draw, and then find out what pleasure, what joy, what rapture serene it is to smoke the filter cigarette with the unfiltered taste. In 1962, as in once and future years, you'll get a lot to like in a Marlboro—available in soft pack and flip-top box in all 50 states and Duluth.

But I digress. We were speaking of the memorable aspects of 1962 and high among them, of course, is the fact that in 1962 the entire House of Representatives stands for election. There will, no doubt, be many lively and interesting contests, but none, I'll wager, quite so lively and interesting as the one in my own district where the leading candidate is none other than Chester A. Arthur!

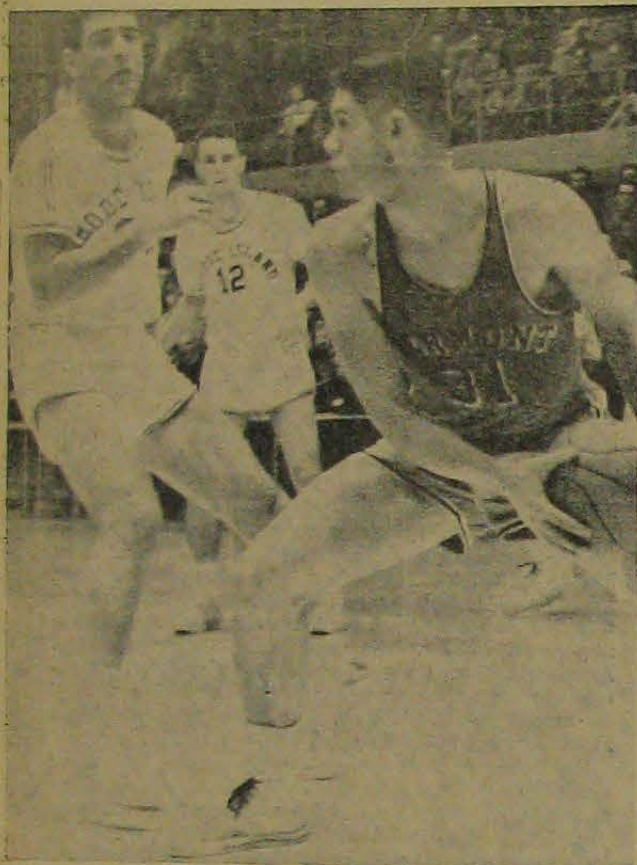

Mr. Arthur, incidentally, is not the first ex-president to come out of retirement and run for the House of Representatives. John Quincy Adams was the first. Mr. Adams also holds another distinction; he was the first son of a president ever to serve as president. It is true that Martin Van Buren's son, Walter "Blinky" Van Buren, was at one time offered the nomination for the presidency, but he, alas, had already accepted a bid to become Mad Ludwig of Bavaria. James K. Polk's son, on the other hand, became Salmon P. Chase. Millard Fillmore's son went into air conditioning. This later was known as the Missouri Compromise.

© 1962 Max Shulman

In Missouri, or anywhere else, there is no compromise with quality in Marlboro or the new unfiltered king-size Philip Morris Commander. The Commander does something new in cigarette-making—gently vacuum cleans the tobacco for flavor and mildness. Get aboard! You'll be welcome.

Rams Defeat Vermont Again On Sat., 70-60; Lee Hits 1,000

The URI Rams behind the clutch shooting of junior Bob Logan defeated the Vermont University Catamounts for the second night in a row, 70-60, at the mid-point of the first half but the Vermonters regained the lead and walked off the floor with a 36-32 halftime lead.

Joe Stahler, number 31 for Vermont and Dave Ricereto fight for a rebound in the game against Vermont Saturday. Bobby Logan, number 12, who scored 19 points for Rhody, looks on.

(photo by Ed Levine)

With Lee hitting with his patented long jumpers and the steady play of Logan, the Rams forged to a 46-all tie, fell behind by two points briefly, then grabbed a lead which they never relinquished.

The game was marked by Lee's 1,000th point of his collegiate career as the 6' 3" Rhode Island forward ended the evening with 14 points.

Other Rams scoring in double figures besides Logan and Lee were Ricereto with 15 points and Koenig who had 11.

Pacing the Catamounts were Jack Shabel with 14 points and Dave Strassburg with 13. Dick Ader and Dave Lawson each contributed 10 to the Vermont cause.

The summary:

Rhode Island (70)			
	G	F	P
Lee	4	6	14
Ricereto	7	1	15
Koenig	2	7	11
Schachter	1	1	3
Weiss	1	0	2
Logan	7	5	19
Rothstein	1	2	4
Stenhouse	0	2	2
Bumpus	0	0	0
Dillon	0	0	0

Vermont (60)			
	G	F	P
Strassburg	6	1	13
Stahler	2	3	7
Becton	2	0	4
Ader	4	2	10
Shabel	5	4	14
Lawson	3	4	10
Nurse	1	0	2
Glick	0	0	0

row, 70-60, in a Yankee Conference game at Keaney Gym.

Logan, who hails from Wayne, N. J., scored 19 points and in general gave the somewhat lethargic Rams a much-needed lift as they scored their third conference victory in as many starts and raised their overall seasonal record to six victories and five losses.

The Rhode Islanders were considerably off from their normal shooting percentage but their hustle and the effective defensive job on the visitors pulled the Rams through without defeat.

The most notable effort was done to the Cats' all-Conference Benny Becton who was held to four points on two first-half field goals. Becton scored 22 points in Friday's encounter.

The Rams also outrebounded the Cats 58 to 47 with Captain Gary Koenig, their 6' 5" center, pacing the way pulling down a total of 21.

With Lee being closely defended, Logan and senior Dave Ricereto, who was next high scorer with 15 points, put the Rams in front 22-15

Rodman Report

by Ginny Giroux

A volleyball sports day for high school girls was held at URI last Saturday under the joint sponsorship of the department of physical education for women and the Women's Athletic Association. Approximately 150 students from 10 Rhode Island high schools participated.

The matches were arranged "round robin" style with each school submitting two teams, each of which completed in one of two leagues. A selection of the high school All-Star team was held and this team played the URI freshman team, beating it in two out of three games.

This sports day was held for two purposes—to promote friendly relations among the high schools of the state and to foster interest in the physical education curriculum for women offered at URI.

The Volleyball Honor Club will play Salve Regina College today at 4 p.m. The Club was defeated in its games last week with RIC and UConn.

The student volleyball officiating group and the Volleyball Honor Club members are planning an informal social to be held the first week of next semester.

Want A Seat at P. C. Game?

The following are the admissions procedures for URI students for the Providence College game at Kingston on Tuesday, Feb. 13.

Students who desire to attend the game will be required to obtain tickets for seat assignments during the week ending Friday, Feb. 9.

Each student is entitled to one ticket and the ID card must be presented in order to obtain the ticket and to be admitted to the game.

The seat tickets may be obtained at Office 109 in Keaney Gym between the hours of 1:15 - 4:15 on Monday through Friday, Feb. 5-8, and 6:15 - 8:15 on Tuesday, Feb. 6, at the lobby ticket window.
